A few years ago the media had a great time telling about the Pope and how it was a sign of his beginning. it was just because lightning struck the top tower. You may remember it.

Not a very long time after that, the media made small if any coverage on the Mecca high holy days. Great lightning came down and knocked over several lift equipment for the walls of the place of the gathering of 2 million Muslims to worship Allah.

This year 2023 right now is the time of their high holy days. The area is swarming with Locusts to the point they cannot worship. Sounds a lot like Moses in Egypt. The travail of birth pangs are increasing rapidly. Continuing to be a watchman, God is great.
