Please note!

We are providing these songs freely --

as far as we know there are no copyright infringements on these songs, so feel free to download them.

We are in the process of setting this area up for Gene Cornell (the musicman). He has an awesome assortment of very high quality music from the early Faith Assembly days down to the present.

We are working on the best format to use and all of the details haven't been decided upon, so please be patient.

Don't upload anything to this section just yet... we may only want to use Gene's stuff here... I'm not sure. He will be the moderator in this section.

You will absolutely be blown away by the quality of music he has!

For those wanting CD's, I'm sure he will provide us with the details on how to order them.

I spoke with him on the phone Tuesday and we decided that this would probably be the best way to do it, but nothing is set in stone yet... like I said, please be patient!

Blessings,
William
