I give all credit to the Holy Spirit who showed me this. Many commentaries agree that Samson did not get water from the jawbone of the chamor Hebrew for word that shocks many. It is not called a donkey. The bible calls it a (---) Anyhow There is proof that shows it was that miracle of the jawbone with water.

because some commentaries do have useful info. I won't throw them in the trash. Many may say they hear the Holy Spirit but they really evaluate things with their reasoning and not pray for wisdom.

The answer is in Judges 15: Samson already took the jawbone in v.17 then he tosses it away. Then he names the place Ramathlehi. He had by the power of the Holy Spirit slay a 1'000 men. Lehi refers to jaw.
in v.18 he is very thirsty from such a mighty feat. He calls on God to help him. God does help him and his response is-- he calls this place Enhakkore which is the fountain of one calling. then we read that to this day Lehi is still the name of the place he called it.

Therefore we can see that Samson didn't experience this miracle in these places, but gives the names of these places out of his wisdom and experience. He named them himself. Therefore it was truly a miracle from God --water out of the jawbone.
