My wife just sent me an article that has helped significantly.

I thought that you all might benefit as well.

It's short and practical; you might glean something from it in these hectic times.

Interesting, I hit a deer Monday, first one ever in a vehicle. Maybe my autopilot wasn't working up to speed... I was thinking I hadn't consumed enough coffee (5:45 am) but maybe that wasn't the case after all.

btw: deer seemed to have survived with minor bruises; my car fared far better than I would have thought (had I been thinking)... Grateful that my guardian angel wasn't running on autopilot and that God's mercies are new EVERY morning.
