I keep hearing that anyway. I have a link below to a video someone sent me about the The Large Hadron Collider (LHC) I've been seeing stuff like this for a while. This latest link came from someone in the faith message.

Basically the collider is used to accelerate particles "almost" at the speed of light in opposite directions and collide them. Very very very expensive. They think they will gain some serious scientific knowledge from it. I think they're right. Leaving aside the spiritual I think it is very interesting.

The LHC is the largest machine in the world. It took thousands of scientists, engineers and technicians decades to plan and build, and it continues to operate at the very boundaries of scientific knowledge.

The issue here is a lot of xians believe it will open the door to the demonic realm and opening the door to a lot of end time events. The rapture being one. I'm also hearing a lot of end time stuff is going to happen in Sept. Stock market crash etc. So is the sky falling? Do we need to sell our houses and escape to the country?

I normally wouldn't say anything but this talk is on every hand. While it is possible Sept could bring some serious problems in the world I seriously doubt we are seeing the bottomless pit being opened etc.

I don't think it is time for the really serious end time stuff to start. Even if some serious stuff happens this Sept (and I doubt it) Its just the world going on as usual. Wars happen stock market goes up and down the world goes on.
