A friend of mine said he had an album that sounded as good as the Allman brothers... I thought of you, so here it is; you be the judge:

sorry, I didn't get this on my iphone, these guys are have good harmony but nothing like the Allman Brothers. Duane Allman though dying very young left behind a legacy of guitar greatness that only two or three people can touch.

I'm biased I admit. but it is what it is.

The other songs are good worship and praise...
