Just a few short years ago lost my job. It was because half my paycheck paid for gas. 4 monthes went by and the Lord blessed with a new job paying 1.50 more per hour. It was half the distance to work also.

The price of gas was $4.00 a Gal. Businesses began to shut down because the gas was to high to send out the trucks. Many stores raised prices on all kinds of products. All of this led to insecurity and people stopped buying. Even homes were not selling.

Well that all led to a recession. Millions of dollars pay for unemployment and national disasters. The cost of gas is around the $3.00 mark.

The gas going up again is the same reason for the recession last time.

The most wonderful thing is that we who are of the faith may be tested but God will not let us down. It is a blessing to look at bible history and see how God met the needs of his people. Jam. 1:17 reminds of the coming down of manna. notice in James it says these gifts cometh down.

Guess we could say quit looking sideways---at earth--- and look up. God has showers of blessings to pour out on us. His son Jesus is a sweet smelling savor to him, we are to.

What a priviledge to worship the most high. He is in control. Those who look to Baal they look downward. He hasn't been to good to the idolaters this year. We don't have to see anything, God sees everything and sends it just at the right time. amen

While listening to people you can learn a lot of things. Always be sure of information by checking it

out. After checking out his info. That was by going to USAtoday.com, The article confirms his statements.

A. That a minor ammount of radiation from Japan has arrived in California.
B. That there is a well over one million bottle sales of pills to protect from radiation.
C. That the panic has caused people to take the pills in error.
that is because if the pill doesn't have anything in your system to fight it could harm you severly.

Questions to ask yourself.
Should you trust in fear?
should you trust the Dr. just because they say so?
It is written, in the last days many hearts shall fail because of unbelief. I humbly confess that my heavenly father is great in power to protect from all harmful things. It is not neccessary to be proud that God will do this---he only asks that we be thankful. He loves us so much is why he will protect us. May he have mercy on those who employ in a system that is not needed when God will take care of his children. That unpredictable system is needed for those who trust in them. Isa. 53: by the wounds of Jesus we are healed. amen.
