OK â€¦..Here is the deal.

Here are the tapes that I have left to transfer to CD so I can put them on OO for free downloading:

2 1974 Glory Barn worship tapes

1 misc seminar tape and 1 1986 seminar tape

2 FA worship tapes by Jerry Ervin

1 Carolyn Robinson tape

4 misc worship sessions tapes by Linda (flute player)

2 Glory Barn worship tapes from 1974

I used to have all of the tapes that Lillian made for the children. I am still looking for them at this time.

Yes Linda, these are yours. Yes, Linda I will return them ASAP.

How can I transfer all of this without doing it in real time?

I did buy a record, tape, radio, and cd player. I can use that. However, you all will get this stuff a lot faster is I donâ€™t have to sit here and do it in real time.

Any suggestions?

The only way I was ever able to do it was by using a tape player that had the ability to make copies fast and that also had an external aux jack that I could plug into my computer. I used a program called Audacity (free, btw) to record from the jack while duplicating the tape to another tape. The player I had would actually put the donald-duck speech out on the aux jack to my

computer and then I'd use Audacity to slow it down to normal speed and then save the mp3. It worked.

Blessings,
William
